

## **Agonis flexuosa**

*WA Weeping Peppermint*

**height:** 15m

**fauna:** Insects, birds, frogs, mammals and reptiles

Medium sized evergreen tree. Dome shaped weeping habit. Forms somewhat out of proportion and has a fibrous trunk with low branches. Ideal climbing tree. White flowers resembling those of the teatree.

## **Allocasuarina fraseriana**

*Sheoak / Kondil*

**height:** 15m

**fauna:** Insects, birds, and reptiles

Upright tree with long needle like branchlets. Flowers from May - Oct with reddish-brown flowers. Fibrous flakey bark.

## **Banksia attenuata**

*Candle Stick Banksia*

**height:** 6m

**fauna:** Insects, birds, mammals and reptiles

Small tree with showy display of yellow, candle-like flowers from spring to autumn. An ideal specimen tree with bird and marsupial attracting flowers. Thrives in any well drained soil in full sun or part shade position. Prune after flowering but do not cut into the old wood.

## **Banksia grandis**

*Bull Banksia*

**height:** 8m

**fauna:** Insects, birds, mammals and reptiles

A tree to 10m tall. Large, deeply divided leaves. Produces golden flowers during spring and summer. Bird attracting, butterfly attracting.

## **Banksia ilicifolia**

*Holly Leaved Banksia*

**height:** 10m

**fauna:** Insects, birds, mammals and reptiles

A medium sized tree. Flowers from at the ends of the branch. Growth colours ranging from yellow to red. In bloom from Jan - Dec.

## **Banksia menziesii**

*Firewood Banksia*

**height:** 5m

**fauna:** Insects, birds, mammals and reptiles

Tree or shrub to 2-6m high. Red, yellow flowers during autumn and winter. Bird attracting (including Carnaby Cockatoos), butterfly attracting, Prune after flowering but do not cut into the old wood as the flowers come from the new growth.

## **Corymbia calophylla**

*Marri*

**height:** 25m

**fauna:** Insects, birds, mammals and reptiles

This beautiful flowering tree in cultivation makes a large-sized tree with a dense rounded crown. In summer it bears large clusters of creamy white or rarely pink flowers followed by urn-shaped capsules. Best suited to moist well-drained soil.

## **Eucalyptus marginata**

*Jarra*

**height:** 40m

**fauna:** Insects, birds, mammals and reptiles

Slow growing erect tree. Bark is brown and fibrous growing in a vertical linear formation. Clusters of white-cream flowers in bloom in Dec or Jan.

## **Eucalyptus todtiana**

*Prickly Bark*

**height:** 15m

**fauna:** Insects, birds, mammals and reptiles

Slow growing erect tree. Clusters of white-cream flowers in bloom in Jan – April. Well suited from sandy to laterite soils.

## **Hakea laurina**

*Pincushion Hakea/Kodjet*

**height:** 4.5m

**fauna:** insects birds, reptiles, frogs and mammals.

A small tree, with long slender leaves, producing pinkish red, medium sized searchin like flowers from April – Aug. Grows in sandy to clay soils.

## **Melaleuca lanceolata**

*Rottnest Teatree*

**height:** 6m

**fauna:** Insects, birds, mammals and reptiles

A medium tree, large shrub, grows well in the sandy and limestone soils of the swan coastal plane. Brown rough bark and fine green leaves with wite-cream flowers in bloom from Jan – Sept.

## **Melaleuca preissiana**

*Moonah, Paperbark*

**height:** 6m

A medium sized tree often found in the lower lying areas of the coastal plane. The tree can get up to 8m tall and 5m wide with a white paperbark trunk and white flowers during summer, attracting birds and bees.

## Nuytsia floribunda

*Christmas tree*

**height:** 10m

**fauna:** Insects, birds, mammals and reptiles

This tree is a root parasite that eventually takes over the host tree with thick succulent type leaves. Prolific golden yellow flowers bloom from Oct - Jan

## Xanthorrhoea preisii (large tube)

*Balga, Grass Tree*

**height:** 4m

**fauna:** Insects, birds, mammals and reptiles

Slow growing tree like structure. White-cream flowers from Jun - Aug
